

Ideation Phase – Brainstorming & Idea Prioritization

Project: Book a Doctor App

Date: 18 June 2026

Generated Ideas

Doctor search by specialization, city, fee range, and availability

Patient registration/login with JWT authentication

Doctor dashboard for slot management and appointment status updates

Admin approval workflow for onboarding doctors

Secure report/prescription upload and storage metadata

Appointment reminders and status notifications

Search filters, profile pages, ratings placeholder, and responsive mobile-first UI

Prioritized MVP Features

1. Authentication and role-based access
2. Doctor listing and profile view
3. Appointment booking and management
4. Admin doctor approval
5. Secure document upload
6. Notifications and dashboard views
