

Project Design Phase – Problem Solution Fit

Project: Book a Doctor App

Date: 18 June 2026

Target Users

Patients seeking faster doctor discovery and booking; doctors needing schedule control; admins managing the platform.

Core Problems

Fragmented booking journey, poor schedule transparency, and lack of centralized medical appointment management.

Solution Fit

The platform directly addresses those problems through searchable doctor profiles, live appointment workflows, secure document sharing, and role-based dashboards.

Value Proposition

One platform for discovery, booking, communication, and appointment administration with secure access and better operational efficiency.
