

Project Development Phase – User Acceptance Testing

Project: Book a Doctor App

Date: 18 June 2026

Testing Scope

Authentication flows, doctor browsing, appointment booking, appointment management, report uploads, admin approval, and responsive layouts.

Sample UAT Cases

Verify patient can register/login and access patient dashboard.

Verify doctor profile appears only after admin approval.

Verify patient can select a doctor, choose a slot, and receive booking confirmation.

Verify doctor can view appointments and update appointment status.

Verify patient can upload a report and doctor can access linked appointment data.

Verify unauthorized users cannot access admin-only routes.

Sign-off Criteria

Critical booking and authentication workflows pass; no blocker defects remain; UI works on mobile and desktop; core CRUD operations persist correctly in MongoDB.
