

Project Planning Phase

Project: Book a Doctor App

Date: 18 June 2026

Product Backlog (High Level)

User auth, doctor onboarding, doctor browsing, appointment booking, appointment management, report upload, admin dashboard, notifications, audit logging, responsive UI.

Sprint Plan

Sprint 1: Project setup, MongoDB schema, authentication, base React layout.

Sprint 2: Doctor module – doctor registration/profile, admin approval, doctor listing APIs/UI.

Sprint 3: Appointment module – slot selection, booking, cancel/reschedule, doctor schedule management.

Sprint 4: Reports upload, notifications, dashboards, validation, testing, deployment hardening.

Estimation & Tracking

Story points should be assigned per backlog item based on complexity and dependency.

Velocity can be measured per sprint by total completed story points. Burndown charts should track remaining points daily.
