

Project Design Phase – Solution Requirements

Project: Book a Doctor App

Date: 18 June 2026

Functional Requirements

User registration/login/logout

Doctor profile creation, verification, and listing

Browse doctors and view profile details

Book, cancel, reschedule, and view appointments

Doctor schedule management and appointment status updates

Upload prescriptions/reports securely

Admin dashboard for approvals and platform oversight

Non-Functional Requirements

Responsive UI for desktop/mobile

Secure authentication and password encryption

Scalable API structure and modular backend

Reliable data persistence and validation

Acceptable performance for search and booking workflows

Auditability through logs and error handling
