

Project Design Phase – Technology Stack

Project: Book a Doctor App

Date: 18 June 2026

Frontend Stack

React.js, React Router, Axios, Bootstrap/CSS, optional Context API or Redux for shared state.

Backend Stack

Node.js, Express.js, JWT, bcrypt, Multer (or similar) for uploads, express-validator/Joi for validation.

Database & DevOps

MongoDB / MongoDB Atlas, Mongoose ODM, Git/GitHub, Postman, optional Render/Vercel/Netlify deployment pipeline.

Application Characteristics

Role-based full-stack web app, REST API architecture, responsive design, secure auth, CRUD-heavy workflows, scalable modular service/controller structure.
